Progress® Telerik® UI for Blazor

KlipTok Utilizes Telerik UI for Blazor to Help Twitch Users Discover Known and Unknown Clips from Prominent Streamers

AT A GLANCE

KlipTok is a new video app that works alongside Twitch, the ever-popular livestreaming platform, that enables Twitch users to search for popular clips of past or archived streams. Creator Jeff Fritz chose Progress® Telerik® UI for Blazor to power the UI of KlipTok and showcase the Blazor framework in action.

Challenge

KlipTok needed better UI support with a toolset that was not only compatible with the Blazor framework, but one with robust features for a user-friendly and professionally looking interface.

> **I feel confident in being able to rely in the output of the Progress Developer teams, that these components are going to be responsive enough to meet the goal of a responsive website that folks can really use."**
>
> **Jeff Fritz,**
> Community Program Manager, Microsoft

Solution

DateRangePicker component to enable users to search for clips that streamed within a particular time period

TileLayout components to build a dashboard interface for Twitch content creators, showcasing how users engage with their videos

Chart and radar graph components with built-in filtering options to visualize and analyze important data and provide insight into user behavior.

Results

The readily available UI components significantly speed up the development process as functionality is implemented and configured in less than an hour.

Fully customizable interface allows Fritz to accommodate user requests without shifting his development priorities.

The Blazor controls guarantee KlipTok's interface has the speed and interactivity people expect from a rich, modern application
