

Fiddler Everywhere Takes Debugging Cross-Platform to MacOS and Linux with Kendo UI

AT A GLANCE

When the Fiddler team wanted to make its original web debugging proxy tool, Fiddler Classic, accessible to users of any device or platform, it chose Progress® Kendo UI® as the foundation for its new product, Fiddler Everywhere.

PRODUCT
Kendo UI for Angular

SOLUTION
Modern UI

INDUSTRY
Developer Tools

Challenge

To deliver on the ecosystem's expectations for a holistic web debugging solution, the Fiddler team envisioned a new tool with an enhanced UI and advanced collaboration features.

"Kendo UI helped us focus on the business logic and strengthen the value proposition to our customers."

Kamen Velikov
Principal Developer, Progress

Solution

A complete UI component suite to rebuild and enrich app functionality and modernize the user experience

High-performing Grid control to power key data-intensive features

Award-winning support team helped quickly resolve issues and speed up delivery cycles

Results

Accelerated the release of Fiddler Everywhere by 50%

The new tool gained 20% more active users in the first month only

Made Fiddler Everywhere's powerful capabilities accessible to macOS and Linux developers

Build Modern Web Applications in Half the Time with Kendo UI
