

Instructions on how to give permissions on the r.a.d.designer folder

Internet Information Services v5.x name of account: ASPNET user	
FAT32 file system	NTFS file system
No need to give permissions on the r.a.d.designer folder.	<ol style="list-style-type: none"> 1. Right-click on the folder where you have installed r.a.d.designer and select Properties. By default, this folder should be named <u>r.a.d.designerX.X</u> and should be located in the C:\inetpub\wwwroot directory. 2. Click on the Security tab. If you do not see the security tab, go to step 3. Otherwise, go to step 8. 3. The Security tab is not visible because you have <i>Simple File Sharing</i> enabled. You will need to disable it before you continue. To disable it, open a Windows Explorer. 4. On the Tools menu, click Folder Options, and then click the View tab. 5. In the Advanced Settings section, clear the <i>Use simple file sharing (Recommended)</i> check box (at the bottom of the list). 6. Click OK. 7. Right-click on the folder where you have installed <u>r.a.d.designer</u> and select Properties. Click on the Security tab. 8. Click on Add (to add a new user). 9. Type ASPNET and click on Check Names. ASPNET should underline (if it doesn't then you don't have Microsoft's .NET framework installed). 10. Click OK. 11. Select the account you have just created (it should be named aspnet_wp account) and check the Full Control box to give it full permissions. 12. Click OK.
Internet Information Services v6.x name of account: Network Service	
FAT32 file system	NTFS file system
No need to give permissions on the r.a.d.designer folder.	<ol style="list-style-type: none"> 1. The same as above but replace ASPNET with Network Service.
